## SUMMARY

Results-driven Software Developer with proven expertise in architecting scalable enterprise web applications using ASP.NET Core, Angular, Flutter, and MySQL. Distinguished by comprehensive full-stack development capabilities, strategic RESTful API design, and agile methodology implementation. Exceptional cross-functional collaborator with a strategic problem-solving approach that consistently delivers high-performance, customer-centric solutions. Committed to transforming complex business requirements into innovative technology implementations that exceed performance benchmarks and drive measurable organizational growth.

## PROFESSIONAL EXPERIENCE

### Software Developer

May 2024 – Present

TrueMirror Technologies

- Developed and maintained enterprise-grade SaaS applications using Angular and ASP.NET Core, adhering to clean architecture and modular design principles.
- Implemented and optimized relational database schemas and queries, contributing to consistent backend performance and data reliability.
- Designed and integrated RESTful APIs, ensuring secure and seamless front-end/back-end communication.
- Collaborated in Agile teams to manage sprint cycles, troubleshoot production issues, and enhance core functionality.

### Customer Support Associate

November 2023 – April 2024

Cogent E-Services (Bajaj Finserv Ltd)

- Executed end-to-end loan processing operations, including documentation verification, application tracking, CRM updates, and technical support for financial system tools.
- Collaborated with internal teams and clients to streamline loan lifecycle workflows, improving data accuracy, turnaround time, and customer experience.
- Facilitated cross-functional coordination across sales, backend operations, and product servicing, aligning financial product knowledge with service delivery.

### Front-End Developer Intern

October 2022 – March 2023

Smartx Brain Solutions

- Created responsive and accessible front-end components using HTML5, CSS3, and vanilla JavaScript.
- Worked in coordination with design and backend teams to integrate APIs and improve user experience (UX) and interface design (UI).
- Contributed to front-end debugging and cross-browser testing to ensure platform-wide consistency and accessibility.

## PROJECTS

### Enterprise Billing System Application

- Built a full-featured billing and inventory management platform supporting invoice creation, bill generation, stock tracking, and customer/product management.
- Designed and developed RESTful APIs for all core operations, ensuring clean backend logic and seamless integration with the front-end.
- Implemented role-based authentication to control access for Admin, Staff, and other user levels across the system.
- Developed with ASP.NET Core (backend) and Angular (frontend), connected via a secure and scalable MySQL database.

## Hardware Data Controlling System

- Built high-performance data management system handling multiple concurrent hardware device connections
- Developed robust APIs enabling real-time communication between IoT devices and web interface
- Designed the system to support multiple device connections simultaneously, with clear status tracking and data visualization for each.

## TECHNICAL SKILLS

---

**Languages :** C#, JavaScript, HTML, CSS, C/C++

**Frameworks & Libraries :** Angular, ASP.NET Core, MVC, Basic Flutter

**DataBase :** MySQL, Microsoft SQL Server

**Development Tools And IDEs :** Visual Studio, VS Code, Git, GitHub, Command Line Tools

**Other Skills:** RESTful API development, Responsive Web Design, Debugging, Agile Development

## EDUCATION

---

**Bachelor of Electronics and Telecommunication Engineering**

2019-2023

*University of Pune*

**CGPA: 7.98/10**

## CERTIFICATIONS

---

**Angular Certification** – Udemy
